

Quick Start Heat N' Brew™ Setup

How to Brew Your Perfect Cup

Water	Coffee
4 Cups/20 oz	~4-5 tbsp
6 Cups/30 oz	~6-7 tbsp
8 Cups/40 oz	~8-9 tbsp
10 Cups/50 oz	~10-11 tbsp

1 tablespoon per cup. Adjust for your preference

SIMPLE BREW DIRECTIONS

- 

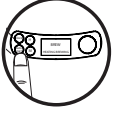

1 Fill Carafe with water – minimum 4 cups (20oz), maximum 10 cups (50oz). Open Flip Lid on top of coffeemaker; pour water into Top Tank. Close Flip Lid. Do not open lid during heating or brewing.
- 

2 Position Drip Free carafe on base under Brew Funnel. Press Brew button to begin heating. (~6 minutes) Coffeemaker is on when the red light around the Brew Button is illuminated.
- 

3 Once heating is complete, the digital display will read 'Brewing'. To turn the Warmer Plate off when brewing completes, push the Brew Button (no red light visible).
- 

4 Warmer plate will automatically shut off after 2 hours. Press & hold Brew Button for 5 seconds to turn back on.

PROGRAMMABLE BREW START DIRECTIONS

- 

1 Press the Auto-Start button. The H (hour) and M (minute) buttons will light up.
- 

2 Set the time by using the H (hour) and M (minutes) buttons, take care to select correct
- 

3 When your desired brewing time is on the digital display, press the Auto Start button to active and the button will illuminate white.
- 

4 Heat N' Brew is now programmed to start heating at your designated time.
