

# FAST CUP<sup>®</sup>

## Bean-to-Cup

Great Coffee *Fast!*

[bunn.com/fast-cup](http://bunn.com/fast-cup)

# Meet the Fast Cup

Profitable, high-performance bean-to-cup coffee brewer that features an intuitive touchscreen experience, freshly ground and brewed coffee by the cup, hot or cold. Dispenses in as little as 30 seconds.

## BUNNLINK® Compatible

BUNNlink is an IoT machine management platform built by BUNN to provide a secure mechanism to remotely monitor and communicate with connected equipment. BUNNlink enables data backed business decisions and allows the deployment of a customized user interface.

## The Fast Cup Experience

1. Users select their favorite drink on a large touchscreen
2. Beans drop from clear hoppers and are ground fresh in seconds
3. Fast Cup creates a drip-style flavor and excellent cup clarity, filling most large cups in approximately 30 seconds from button push to takeaway
4. Three large 3lb+ bean hoppers provide enough holding capacity for more than seventy 16oz cups of coffee each

With three bean selections and options for hot and iced coffee, Fast Cup delivers more options from a single platform.

# Reduces Demand for Staff Labor

Reduce the number of operator touches per day with three large 3lb+ bean hoppers that provide enough capacity to make 70 cups of coffee each. The large bin holds the spent grounds from up to fifty beverages, while the through-counter grounds option allows for an even greater capacity. No paper filter to replace and Picture Prompted Cleaning™ on the touch screen ease training and maintenance routines.

## Practically No Coffee Waste

The bean-to-cup system delivers single cups of fresh coffee, ensuring all your beans are brewed into your customer's cup. This complements dayparts with varying demand for coffee.

## Build Your Coffee Menu with Hot & Iced, Drip-style Coffee

Fast Cup offers an expanded selection of drinks, including options for both hot and iced coffee. The iced coffee option cools freshly brewed coffee as it dispenses, making it perfect to pour over ice without watering down your beverage.

## Configurable Touch Screen

Promote your brand by uploading graphics and videos for display on the large 10" industrial glass touchscreen. Features a swipe function to allow the customer to easily navigate drink selections. Manager/crew member and tech sub-menus are also accessible from this screen.

## ADA Compatible

ADA keypad and steep screen-viewing angle welcomes all customers.

## Cup Clearance

9.1" cup clearance accommodates most travel cups with visual cues for cup placement.

## VirtualTOUCH™

Introducing a touchless beverage dispensing experience from BUNN. With this optional feature, your customers can conveniently select and dispense a beverage simply by scanning a QR code.

### Additional Features

9.1" cup clearance accommodates most travel cups with visual cues and lighting for cup placement

USB back-up and restore for machine configuration/recipe settings and cloning for multiple locations

BUNNlink® remote connectivity to manage and care for your fleet

VirtualTOUCH™ optional beverage dispensing technology using a QR code instead of your smart device

### Profit & Waste Calculators

Use your numbers on our exclusive Profit and Waste Calculators for profitability and payback scenarios. Contact your BUNN Representative to learn more.
