

Water Filtration

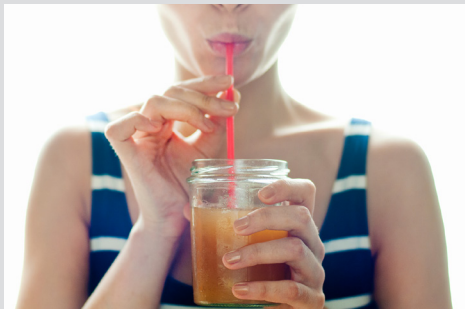

High-Performance Water Filtration Solutions

<https://commercial.bunn.com/water-quality>

EXCEPTIONAL CUSTOMER EXPERIENCE

- Maintains beverage consistency and product quality
- Reduces unpleasant tastes and odors
- Provides optimum extraction of coffees and other beverages

MODULAR DESIGN

- Expandable options to meet changes in water filtration needs
- Straightforward installations with service-friendly features
- Operational efficiency with customizable system packages

LOWER TOTAL COST OF OWNERSHIP

- Superior carbon-block technology prevents premature clogging or short cycling
- Enhanced equipment protection with highest amount of scale-reduction media per filter
- Highest-rated chlorine and chloramine capacities in the industry

IMPORTANCE OF WATER FILTRATION

- Produces quality food and beverages
- Drives consumer satisfaction and trust
- Results in repeat business for higher sales and profits
- Reduces equipment down-time and unnecessary repairs

HIGH PERFORMANCE WATER FILTRATION SOLUTIONS

BUNN High Performance Water Filtration Solutions are designed to ensure peace-of-mind operation in a variety of foodservice applications where water quality is critical.

WEQ Products

Point-of-use filters and systems are perfect for equipment-specific water filtration needs. WEQ filters are compatible with the EasyClear product line and designed to provide the same quality recipe water with just a slightly different look.

WQ Products

For multi-point water treatment needs at the full beverage bar level, WQ products offer a modular design that allows for customization and expandability along with superior mechanical water filtration performance. Most of these filters treat greater volumes of water. Some have the highest capacities available in the market, in many cases, replacing multiple cartridge systems.

BUNN WATER FILTRATION SOLUTIONS. BUILT BY SCIENCE. BACKED BY EXPERTISE.

Water is the essential component of any prepared beverage and is even represented in the BUNN logo with the blue pie shape – the alchemic symbol for water. Although water is treated around the world to make it potable, it may not be ideal for producing quality beverages and protecting beverage equipment.

BUNN is the partner you can count on to manage your water filtration program backed by a full portfolio of innovative beverage equipment and customizable, professionally-managed service programs across all beverage platforms. This total-service solution improves operational efficiency to ensure repeat business and quality in every cup.

BUNN IS YOUR PARTNER IN NAVIGATING THE ADVANCES IN WATER-FILTERING TECHNOLOGY.
