

## *BUNN Beverage equipment Shut Down and Start-up procedures*

### Equipment Shut Down:

- ◇ Discard all consumables (for example: juice, coffee, concentrates, beans, powders, beverage mix, etc.)
- ◇ Perform the standard daily and weekly cleaning procedure on the equipment. If needed, refer to equipment manuals and cleaning guides for instructions. Manuals can be found online at [www.bunn.com](http://www.bunn.com).
- ◇ Disconnect power to machine. This may require unplugging the power cord from the wall receptacle or shutting off a dedicated circuit breaker.
- ◇ Shut off the incoming water supply to equipment.

### Equipment Start-Up:

- ◇ Reconnect and turn on incoming water supply.
- ◇ Reconnect machine to power.
- ◇ Perform standard daily/weekly cleaning procedures. If needed, refer to equipment manuals and cleaning guides for instructions. Manuals can be found online at [www.bunn.com](http://www.bunn.com).
- ◇ Refill consumables with fresh product (for example: juice, coffee, concentrates, beans, powders, beverage mix, etc.)
- ◇ Run equipment to confirm proper operation.
