Brewing and Daily Cleaning Directions

**MODEL T ICED TEA BREWING**

- Begin each brew cycle with a clean empty brew funnel.
- Insert a BUNN® Tea filter into the funnel.
- Pour the packet of loose fresh tea into the filter.
- Level the bed of tea leaves by gently shaking the brew funnel.
- Slide the loaded brew funnel into the funnel rails until it stops.
- Locate the funnel tip directly over the hole in the desired reservoir cover.

- Fresh tea is available at the faucet.
- The small red light will glow when the beverage drops below the 1/2-gallon level.
- Drain the reservoir before starting a new brew cycle.

- Place the power switch in the ON position (Model T3) or select the desired reservoir RIGHT or LEFT (Model T6).
- Momentarily press the start switch.
- When tea no longer drips from the funnel tip, carefully remove the brew funnel and discard the used filter.
- Return the switch to the OFF position to prevent a false start.

**CLEAN AND SANITIZE YOUR ICED TEA BREWER DAILY**

- Remove the brew funnel and thoroughly clean.
- The funnel tip and screen must be free from any tea particles or residue.
- Reassemble the funnel.

- Place the ON/OFF or selector switch in the OFF position.
- Remove and thoroughly rinse the sprayhead.
- The holes must be open and clear of any mineral deposits.
- Wipe the sprayhead panel clean with a damp cloth.

- Insert the deliming spring into the sprayhead fitting until no more than one inch is visible and move it in and out 5 or 6 times.
- Insert the spring into the airvent hole in the sprayhead panel and move it in and out 5 or 6 times.
- Reattach the sprayhead.

- Thoroughly clean the entire inside surface of the reservoir, the surface behind the reservoir rim, and the faucet shank with a brush using a mild detergent and water solution.
- Rinse the reservoir and shank with warm water.

- Disassemble the faucet.
- The faucet cleaning procedure requires a 3-compartment sink.
- Thoroughly wash all faucet parts in a mild detergent and water solution in the first sink.
- Rinse the parts in hot water in the second sink.
- Sanitize all exposed surfaces of the reservoir with a 75° warm chlorine solution (at least 100 ppm).

- Twist the faucet shank nut in a clockwise direction and remove the faucet from the brewer.

- Sanitize all exposed surfaces of the reservoir with a 75° warm chlorine solution (at least 50 ppm).
- Empty the reservoir, insert the brew funnel and thoroughly rinse everything by running two complete brew cycles, emptying the reservoir after each.

- Wash the entire outside surface of the brewer with a clean damp cloth.

DO NOT KEEP BREWED ICED TEA OVERNIGHT
