

EMEA CATALOGUE

2020 EQUIPMENT CATALOGUE

QUALITY SINCE 1840™

Bunn-O-Matic Corporation® can trace its foundation to 1840 when Jacob Bunn opened his grocery store in a developing Springfield, IL USA, and a young Abe Lincoln was one of his first customers.

That venture grew into Bunn Capitol Wholesale Grocery Company and was later managed by George R. Bunn who founded a beverage equipment division in the late 1950s. Bunn-O-Matic Corporation was officially incorporated as a separate entity in 1963, and since that time has been at the forefront of dispensed beverage equipment manufacturers.

The company remains privately-held and family-owned through five generations of Bunn family entrepreneurship. It has evolved from a foodservice and coffee focus to include a long list of equipment innovations in all dispensed beverage categories. Now often referred to simply as “BUNN,” the company has become a global partner you can count on for profitability, reliability and support wherever customers are served.

A glass mug filled with dark coffee sits on a dark surface, surrounded by scattered coffee beans. The image is overlaid with a blue geometric pattern of overlapping shapes. The word "COFFEE" is written in white, uppercase letters across the front of the mug.

COFFEE

Infusion Series® Platinum Edition®

The New Infusion Series Platinum Edition line of brewing equipment is equipped with an intuitive 4.3" touch screen, providing an enhanced user experience when operating and programming the brewers

ICB DV, ICB DV TALL AND ICB TF

Intuitive 109cm touchscreen with user interface provides an enhanced experience when operating and programming the brewers

The powerful duo of a BUNN-exclusive Peak Extraction™ Sprayhead coupled with SmartWAVE® technology delivers increased turbulence in the coffee bed, unrivaled uniformity of extraction, and complexity in the finished beverage

USB port for easy programming

Digital readout displays in English, Spanish, or French—for easier programming and control

Electronic funnel lock prevents removal of each brew funnel until drip-through is complete

ICBA PE is compatible with new TF 1.8L and 3.8L ThermoFresh® Servers (with Base), all previous generations of TF 5.7L TF Servers (with Base), Titan® 5.7L servers, and Airpots

ICBA PE

 Servers sold separately

Infusion Series® Soft Heat® Edition

BUNN-exclusive Soft Heat technology supplies controlled heat to the brewed coffee within the server whenever it's docked on the brewer, ensuring ideal holding temperatures and optimal flavor for longer periods

Sleek modernized design language on the brewer and servers

The exclusive Peak Extraction® Sprayhead features grooves that capture minerals and isolate the directional stream holes which then spray the whole coffee bed, providing full saturation and the ideal uniformity of extraction.

Three brew buttons and three batch sizes allow for multiple brewing profiles

Easy Pulse programming automatically adjusts contact time for optimal flavor profile

Compatible with BrewWISE® intelligence

Wireless Server monitoring on some models allows for remote tracking of coffee freshness on mobile devices

New Infusion Soft Heat® servers [sold separately] are ergonomic, lighter weight, energy efficient and now offer programmable recipe/ batch based holding times and temperatures, alerting staff when freshness has expired or server is empty

Compatible with new Infusion SH servers, new TF 5.7L ThermoFresh® Servers (with Base), and all previous generations of TF 5.7L TF Servers (with Base)

GRINDERS

G Series VH Grinder

Users have 340° of grind resolution on the “no-click” selection dial, giving them complete freedom when dialing-in their ideal grind particle size

Available in .45kg, .91kg and 1.36kg versions. the GVH series features tinted hoppers that are sleek and durable.

Versatile design allows grinding into bags, cans, and cups and other containers to meet a multitude of customer needs

Fast grinding – one pound (.45kg) in about 30 seconds – maximizes speed of service

340° dial resolution for precise tuning of grind particle size

Ergonomic clamp for holding smaller size bags and containers in place for hands-free operation

Easy to use cleaning lever for complete removal of coffee from grind chamber ensures the customer gets all the coffee ground for them

Precision Rockwell 65C hard burrs provide consistency, grind after grind

Bag switch prevents grinding before bag/container is in place

Four-year warranty on grinding burrs

Multi-Hopper Series Grinder and Storage System

An intuitive, portion-controlled coffee grinding system that handles multiple bean varieties

Portion-controlled for the right amount of coffee every time, with 3 batch sizes per hopper

Convenient front-loading hoppers are easy to clean and store individual coffee grind weight profiles

Choice of black or stainless finish

BrewWISE® intelligence means the Smart Funnel® manages the grinding and brewing process from start to finish:

Grinder adjusts the grind time for each batch to deliver just the right grind volumes

Grinder communicates coffee batch size and coffee name to the Smart Funnel during grinding process

BrewWISE brewer reads the information in the Smart Funnel, adjusts the recipe, and brews a flavorful batch of coffee

Rack and Hopper

Store and display coffee varieties and promote fresh ground coffee program

Hoppers with locking lids serve as storage containers when not in the grinder (lock for lids sold separately)

Nitron²® Cold Draft

Keg-free design delivers authentic Cold Brew taste without need for a complex brewing process

Achieve a nitro infusion with no kegs to change-out, store, clean, or sanitize. Uses two 3.8L concentrate BIBs or BUNN refillable containers that staff are already familiar with and each BIB yields multiple liters of finished drinks

The Nitron Experience: No milk or sugar needed! BUNN's patented in-line gas infuser produces up to 3 minutes of cascading micro-bubbles*, resulting in a nitro cold brew crowned with a smooth, silky stout-like head that tastes distinctively creamy with a velvety soft mouthfeel.

Outfit the standard and nitro taps with separate beverages - your choice of cold brew coffee, iced coffee, or iced tea - all from one slim, 25.40cm wide countertop design

At a rate of one 473mL drink per minute, can dispense 60 drinks before exceeding 5°C

**based on product concentrate used*

ThermoFresh® Mechanical Gauge Servers

Holds flavour profile for hours without traditional warming plates

TF Server

Glass sight gauge on front of server allows for visible indication of level capacity

Brew-thru lid design also features a pour spout for easy emptying and cleaning

Translucent faucet guard for visibility while dispensing

Ideal for use with Single or Dual TF DBC and Infusion Series® Brewers

TF Server without stand

Ideal with Infusion Series® Coffee Brewer (ICB)

TF server stand

Use for easy dispensing; 17.9cm cup clearance

Built-in drip tray is easily removed for cleaning or providing extra clearance for

Titan TF Server

11.36L capacity

Insulated and portable

Large cup clearance for a variety of dispensing options large vessels

PAPER
FILTERS

Paper Filters

Selection of coffee filters is a vital step in brewing perfect coffee - don't settle for anything less than BUNN® quality coffee filters. Using the results of years of research, BUNN manufactures the best filters from high quality, heavy weight paper, so the water flows properly through the coffee. Our filters are uniquely designed for strength with taller walls to help reduce overflow and grounds in your coffee.

BUNN's paper stock used in the manufacturing of our coffee filters is produced using an elemental chlorine-free (ECF) bleaching method.

BUNN Paper Filter materials meet:

Restrictive limits as stated in Resolution ResAP(2002)1 on paper and board materials intended to come into contact with foodstuff

Compositional and end product requirements stated in the Dutch legislation "Regeling Verpakkingen en gebruiksartikelen, Chapter II, Paper and board, pt 2 Paper and board used as cooking paper and for filtering above 80°C"

Limits stated in the German recommendation BfR XXXVI Paper and board for food contact and the special requirements in BfR XXXVI/1 for Cooking Papers, hot filter papers and filter layers
